29th March, 2016

Dear Hiring Manager,

I have been closely following the developments around the Rural Broadband Initiative (RBI) around Marlborough. I read about your company on stuff.co.nz and on hillsholesandpoles.nz.

My name is George Timmermans and I am a recent Software Engineer Graduate with a background in Tool making and a qualified Ubiquiti Broadband Wireless Admin. With the planned expansion to Waihopai and Wairau Valley I could apply my skills calculating, designing, installing, configuring and maintaining equipment.

I have enclosed my CV to support my skill set and experience. It shows that I would bring important skills to the company, including:

- Networking skills
- Wireless Frequency Fundamental skills
- Software Engineering skills
- Mechanical Engineering skills

At the beginning of 2015 I designed, built and deployed a Wireless Internet Service Provider (WISP) for a rural community near Picton using Ubiquiti equipment. To design a robust and scalable system I had to apply my knowledge of radio frequency fundamentals, networking, mechanical engineering and electronics. The system includes a remote repeater station with two cameras and a weather station that I built and programmed. I maintain the WISP to this day.

Documentation of the system can be found on my website (georgetimmermans.com). I also advise Sounds Community Connect (SCC) providing internet to Kenepuru and Pelorus Sounds on their current WISP upgrade.

I appreciate your time in considering my request to meet you in person. I look forward to hearing from you.

Yours faithfully,

George Timmermans
